Bridges School Board believes that all programs will be presented in a uniformed format and done so with input from various communities of Bridges; administration, teachers, staff members, community members, parents and students.

When required by law or determined to be a useful tool to accomplish school goals, school site councils or other school advisory groups shall develop comprehensive school plans designed to enhance student achievement at individual school sites.

Single Plan for Student Achievement

The Director or designee shall ensure that a single plan for student achievement is prepared by the school site council as required by law for each school participating in specified state and/or federal categorical programs. (Education Code 41507, 41572, 52055.755, 64001)

Whenever feasible, any other school plan may be incorporated into the single plan for student achievement.

The Director or designee shall review the school's single plan and ensure that it has been developed and approved by a properly constituted school site council, meets the content requirements for all programs included, is based on an analysis of current practices and student academic performance, and reasonably links improvement strategies to identified needs of the school and students. The Director shall submit to the Governing Board his/her recommendations for plan approval or recommendations regarding any subsequent material revisions of the plan.

The Board shall review and approve the school's single plan for student achievement at a regularly scheduled meeting. The Board also shall review and approve any subsequent revisions that include material changes affecting the academic programs for students participating in these categorical programs. The Board shall certify that, to the extent allowable under federal law, the plan is consistent with district local improvement plans required as a condition of receiving federal funding. (Education Code 64001)
